About Me

Network & Security Engineer specialized in network security administration, firewall management, security monitoring and incident response. Skilled in **TCP/IP** networking, **VPNs**, **IDS/IPS**, firewall rule management, risk analysis, troubleshooting and security operations. Experienced with **Fortinet** technologies, network infrastructure, **SIEM** platforms and security documentation. Strong ability to collaborate with cross-functional teams, manage security changes and communicate effectively with stakeholders in both French and English.

Achievements

MACC 2026 CTF — National Champions (1st Place) DGSSI, 2026
National Cybersecurity Capture-The-Flag organized by Morocco's national cybersecurity authority (DGSSI), across offensive and defensive challenges.

Professional Experience

Network and IT Security Engineer — Black Box Solutions, Casablanca Sept. 2024 – Present
• Administered and monitored network security infrastructure based on **FortiGate** firewalls, including firewall policy management, site-to-site and remote access VPN configuration, traffic inspection, NAT rules, and security event monitoring.
• Administered and configured enterprise network infrastructures including **Cisco Switching & Routing** and **FortiSwitch** environments.
• Implemented **SIEM**-integrated **EDR/XDR** capabilities with **Wazuh**, **YARA** rules, and **MISP** for endpoint monitoring, IOC enrichment, alert correlation, and threat detection.
• Administered and maintained virtualized infrastructures based on **VMware ESXi** and **Proxmox VE**, ensuring system availability, performance, and business continuity.
• Implemented and managed network security controls, including firewall policies, **VLAN** segmentation, access control mechanisms, and secure network architectures.
• Participated in incident response activities, root cause analysis, and the implementation of corrective and preventive actions.
• Developed technical documentation, operating procedures, and infrastructure diagrams to support operational excellence and knowledge sharing.
• Collaborated with infrastructure, system, and security teams to ensure compliance with security standards and operational requirements.

End-of-Year Internship — EVERNEX Morocco, Casablanca Jun. – Sept. 2023
Technical support level 1 and 2, **diagnostics** and **incident resolution**.
On-site interventions on critical equipment in client **Data Centers (HPE, Dell, EMC²)**.
Design and virtual deployment of a **Data Center infrastructure** solution; **Low Level Design (LLD)** and network simulation via **EVE-NG**.

Projects

AISOC — Agentic SOC Platform 2026
End-to-end agentic SOC automating incident response with **Wazuh** (SIEM/XDR), **MISP**, **TheHive/Cortex**, **LangGraph** LLM agents, multi-level memory/**RAG**, and **React/Socket.io**.
RAG-Powered RCA Decision-Support Platform 2026
Multi-agent AI platform (**LangGraph**, 6 agents) accelerating **Root Cause Analysis** — fully local (**Mistral 7B + Ollama**), **RAG** over historical cases via **ChromaDB** (80%+ accuracy), **FastAPI** / **React**.
SOC / SIEM, SOAR & AI — ENIAD Lab 2025
Automated SOC on Dell EMC² / VMware ESXi: Wazuh (detection), **TheHive** (IR), **Cortex & MISP** (enrichment); **LLM-based alert triage (Gemini API)**, **SOAR** automation via **Shuffle**.
SIEM Detection Lab (ELK + Suricata + Zeek) 2025
SIEM environment on **Ubuntu**, real-time traffic analysis with **Suricata & Zeek**, centralized via **Filebeat**, **Elasticsearch**, and **Kibana (Docker)**.

Technical Skills

SOC & Blue Team	Wazuh, ELK Stack (Elasticsearch, Logstash, Kibana), Suricata, Zeek, TheHive, Cortex, MISP
AI Security & SOAR	LangGraph, LangChain, RAG, Ollama, ChromaDB, pgvector, AIGOSEC
Cloud & Virtualization	VMware ESXi, Proxmox VE, Docker, DigitalOcean
Network Security	TCP/IP, VLANs, VPNs, Firewall Configuration, IDS/IPS
Networks & Infrastructure	FortiGate, FortiSwitch, Cisco Switching & Routing, Dell EMC ² Servers, HPE Servers
Offensive Security	Nmap, Wireshark, Nessus, OpenVAS, Burp Suite
Programming & Automation	Python, Bash, PowerShell, Git

Education

Engineer's Degree — Network and IT Security Engineering 2023 – 2026
ENIAD – Berkane
DEUST in Mathematics, Computer Science, and Physics (MIP) 2021 – 2023
FST – Faculty of Sciences and Technology, Al Hoceima
High School Diploma in Physical Sciences 2020 – 2021
Lycée Taha Houssein

Certifications

Fortinet NSE 1	Fortinet NSE 3	Cisco CCNA	Fortinet NSE 2
Dec. 2025	Dec. 2025	2026	In progress

Extra-Curricular Activities

Trainer @ ENIAD Berkane — designed and led workshops on **Git & GitHub** and **Linux / Bash** (CLI, scripting), with hands-on collaborative and CTF exercises.

Languages

French	English	Arabic
